

ML型梅花弹性联轴器

ML type plum blossom elastic couplings

- 结构简单，传递力矩大，噪音小，承载能力较高；
- 具有补偿两轴相对位移功能，弧线接触，使用寿命长；
- 适用于联接两同轴线、起动频繁、正反变化、中低速、大小功率传动轴。
- Simple structure, big transmission, lower noise and high bearing capacity.
- It has the function of compensating the relative displacement of the two axes, arcs contact and the long service life.
- It is suitable for connecting two coaxial lines, frequent starting, positive and negative changes, middle and low speed, large and small power transmis

ML型聚氨酯梅花弹性垫

ML polyurethane plum blossom elastic cushion

产品用途：梅花型弹性联轴器是一种先进的联轴器接收装置。广泛应用于轧钢、起重、锻压、石油等大型设备和其它各种机械设备的传动轴端联接。

Product use: the plum blossom spring coupling is an advanced coupler receiving device. Widely used in steel rolling, lifting, forging, oil and other large equipment and other mechanical equipment of the transmission shaft connection.
