

## NL型齿式弹性联轴器 NL type toothed elastic coupling

- 使用简单，易维修，缓冲吸振；
- 可补偿较大的轴向位移，微小的径向位移和角位移；
- 适用于正反向变化多，启动频繁的高速轴。
- Easy to use, easy to repair, buffer vibration;
- Compensable large axial displacement, micro radial displacement and angular displace;
- It is suitable to change many reverse changes and start the high speed shaft.

## NL型齿式联轴器尼龙齿套 NL tooth coupling nylon sleeve

NL联轴器是目前国内的最新产品，在国内外已经广泛地被采用，该产品由机械委济南铸造锻压机械研究所设计，适用于轴间及挠性传动，允许较大的轴向径向位移和角位移，并具有结构简单、维修方便、拆装容易、噪声低、传动功效损失小、使用寿命长等优点，倍受用户欢迎。

为满足各种机械的更新改造及引进设备备件需要，我厂可以提供品种规格齐全的内齿形弹性联轴器，并且根据用户需要接受非标准订货。

NL coupling is the latest product in China. It has been widely used at home and abroad.

The product is designed by the Ji'nan Institute of foundry and forging machinery, and is suitable for inter axle and flexible transmission. It allows larger axial radial displacement and angular displacement, and has the advantages of simple structure, convenient maintenance, easy disassembly and assembly, low noise, little loss of transmission efficiency and long service life. It is welcomed by users.

In order to meet all kinds of mechanical renewal and selection and equipment spare parts, our factory can provide all kinds of internal tooth elastic couplings with various specifications, and accept non-standard orders according to users' needs.
